Exploration & Production Technology Summit 2009

September 24th-25th, 2009

The Woodlands Waterway Marriott Hotel & Convention Center, Houston, Texas

Ensuring future reserves growth through innovative E&P optimization

Building on four years of success in providing timely information and world-class events to the European E&P market, the Exploration & Production Technology Summit now crosses the Atlantic to deliver an unparalleled event experience to North America's most progressive E&P operators, oil & gas majors, growing Independents and emerging junior E&P corporations. Join us as we explore dynamic strategies, benchmark the latest technologies and analyze the industry's most cutting-edge practices – a North American perspective to a global challenge.

[Click here to view the event program](#)

Now includes an Exclusive Site Visit to Baker Hughes brand new Center for Technology Innovation!

Hot topics include

- Essential E&P project updates – get insight into the strategies driving enhanced exploration and production
- Discuss with top industry experts how to determine and address rising project costs
- Identify solutions to increasing workforce challenges and learn how to implement them in your organization
- Uncover the details regarding the new technological dawn in the Gulf of Mexico as well as key offshore and subsea developments
- Evaluate new geographical opportunities for E&P growth
- Learn how to boost your bottom line through the development of new technologies for field optimization and enhanced oil recovery
